Look at it this way

Take every advantage you can think of as contributing to the desirability of a building-centrality of location, transit accessibility, improved fire protection, speed and intensity of elevator service, last-minute improvements and appliances, efficiency and courtesy of attendants, reasonable rentals, and any other consideration that may occur to you-

We repeat, that if you will take every advantage you can think of as contributing to the desirability of a building, you will find that the Equitable contains everything that the best of other buildings ever had—and many advantages besides!
